The Utah Insurance Exchange was created in August 2009 in response to legislation passed in 2008 and 2009 (HB 133 & HB 188). This directed the Office of Consumer Health Services to create an internet portal that will facilitate the requirements specified in Utah's Health System Reform legislation. The Exchange is designed to provide Utahans with a one-stop shop to guide consumers to help them be more in control of their health, health care, and financing decisions.
